Introduction

Amid the rapid global transformations toward achieving sustainable development, universities have evolved into active institutions that go far beyond their traditional roles in education and research. They have become leading platforms that drive positive change in society, the economy, and the environment. In this context, Gilgamesh University has adopted the Seventeen Sustainable Development Goals (SDGs) set by the United Nations in its 2030 Agenda, integrating them into its institutional strategy as a comprehensive framework guiding its academic, research, and community activities.

Gilgamesh University has been keen to embed sustainability concepts across all areas of its operations — beginning with the development of curricula that enhance environmental and social awareness among students, continuing with the encouragement of applied scientific research that contributes to solving community problems, and culminating in community-based initiatives that promote justice, equality, and the preservation of natural resources.

The university seeks to stay aligned with global advancements in sustainability through its ongoing commitment to implementing modern international standards and monitoring relevant global trends. It follows a visionary and developmental policy based on regular review and evaluation of its programs and procedures, ensuring alignment with current environmental, economic, and social transformations. This reflects its deep sense of responsibility in mitigating the environmental impacts resulting from its academic, administrative, and service activities.

Driven by a profound awareness of its pioneering role in advancing sustainability principles, and with a firm commitment to providing an integrated university model that contributes to improving the quality of life for present and future generations, Gilgamesh University has established clear goals and policies to organize actions that preserve sustainable development and achieve balance between developmental needs and biodiversity.

These goals include reducing the university's carbon footprint, providing a green and eco-friendly campus aligned with the requirements of sustainable development, promoting environmental awareness among students, faculty, and staff, and encouraging them to adopt responsible and sustainable practices. The university also aims to make its educational environment a model for integrating environmental protection principles within its academic system, reflecting its modern vision of higher education that is strongly linked to sustainability and natural resource preservation.

Operating within the Iraqi local context, Gilgamesh University recognizes the need for innovative and context-sensitive responses to developmental challenges. It actively pursues regional and international partnerships to exchange expertise and develop joint solutions in the fields of energy, education, health, water, climate, and good governance.

This report presents a comprehensive overview of Gilgamesh University's efforts in achieving the Sustainable Development Goals, through a review of the programs, activities, and projects implemented (and continuously developed) by its faculties, centers, and administrative units. These efforts align with Iraq's National Vision for Sustainable Development 2030 and reinforce the university's position as a leading and responsible academic institution committed to society and the environment.

Message from the President of Gilgamesh University

Prof. Dr. Anwar Subhi Al-Jubouri

In the Name of Allah, the Most Merciful, the Most Compassionate

Driven by our deep belief that the university is not merely an educational institution but rather the house of expertise and the intellectual core of society, Gilgamesh University has, since its establishment, aspired to become a model in integrating the principles of sustainable development into education, research, and community service.

We have worked to create a campus environment that upholds human values and social responsibility, while supporting rigorous scientific research that provides practical solutions to the challenges facing our beloved nation.

We take pride in having placed the Sustainable Development Goals (SDGs) at the heart of our academic and administrative policies, believing that achieving development in Iraq begins with quality education and an aware university community.

We continue to pursue regional and international partnerships with leading academic and research institutions to enhance scientific exchange, build capacities, and support comprehensive development projects—striving for a more sustainable and just future for generations to come.

May Allah grant us success in serving our country and academic community in ways that fulfill the aspirations of development and prosperity.

Gilgamesh University Vision for Sustainable Development:

To be a leading academic institution in education, research, and innovation, actively contributing to achieving sustainable development locally, regionally, and globally, and graduating qualified leaders capable of building a knowledge-based society, a balanced economy, and a sustainable environment.

Gilgamesh University Mission for Sustainable Development:

To provide quality education and applied scientific research that align with the requirements of sustainable development in Iraq, contributing to the development of human capital and empowering students and researchers to acquire innovation and social responsibility skills, within a university environment that fosters local, regional, and global partnerships.

Gilgamesh University Goals in the Field of Sustainable Development:

1. Integrate the principles of sustainable development into selected curricula across various disciplines to enhance students' environmental, social, and economic awareness.
2. Encourage applied scientific research focused on addressing national issues such as energy, water, public health, unemployment, and quality education.
3. Develop strategic partnerships with national and international universities and institutions to support the SDGs in areas of education, climate, innovation, and peace.
4. Promote environmental practices within the campus through recycling programs, energy and water conservation, and expanding green spaces.
5. Empower women and youth through academic and community initiatives that promote equality and social justice.
6. Enhance good university governance through transparency, accountability, and active participation in decision-making.
7. Engage with the local community through volunteer programs and social initiatives that support vulnerable groups and improve quality of life.

Gilgamesh University Activities and Applications for Achieving the Sustainable Development Goals (SDGs):

Gilgamesh University is firmly committed to achieving the Seventeen United Nations Sustainable Development Goals (SDGs) by embedding sustainability principles across its educational, research, and community domains. This report presents how the university applies each of the SDGs, offering detailed examples of activities, programs, and initiatives that actively contribute to the realization of these global goals.

No Poverty

As part of its commitment to achieving the Sustainable Development Goals, the University of Gilgamesh hosted an Iftar banquet for orphans.

On Monday, April 17, the University of Gilgamesh organized an Iftar banquet for orphans, reflecting its deep belief in the importance of supporting this vulnerable group and its ongoing role in promoting social welfare across all segments of society. The university is committed to ensuring that no event or occasion passes without providing meaningful support to the community, fostering social cohesion and solidarity. Welcoming the orphaned children was both inspiring and heartwarming, demonstrating the university's dedication to giving back to society and supporting those in need.

In a serene Ramadan atmosphere, as the sun set to signal the time for Iftar, the calmness of the moment blended beautifully with the innocent laughter of children, spreading joy and painting a vibrant scene on the grounds of the University of Gilgamesh, filled with warmth and hospitality. Every detail of the event was carefully prepared, from table arrangements to food presentation, ensuring that the orphans felt at home.

On all levels and during various occasions, the University of Gilgamesh has proven that it is not only a center of academic excellence but also a place deeply committed to the well-being of its community. The event was a success

and left a lasting impression on all attendees.

Upon arrival, guests were greeted by university staff and volunteers with smiles and embraces, accompanied by a diverse selection of delicious dishes. The orphans enjoyed their meal in a welcoming and comfortable environment. Entertainment activities were also provided, bringing smiles to the children's faces and creating a festive, joyful atmosphere.

This initiative represents the university's commitment to giving back to the community and supporting those less fortunate. It reflects the institution's values of empathy, inclusivity, and sustained engagement with different segments of society, in line with the principles of sustainable development.

Eradicating poverty is the cornerstone of a society where opportunities are equitable and human dignity is preserved.

Gender Equality

On International Women's Day, the message of the University of Gilgamesh extends to affirm that empowerment is not merely a slogan raised on a single occasion, but a sustainable pathway toward building a more just and balanced society.

Driven by this deep conviction, the university strives to be a beacon that gathers Iraqi girls under the umbrella of awareness and development, opening doors for learning and training, igniting in them the spirit of leadership and creativity, and providing them with full space to express their talents and capabilities in a supportive and stimulating environment.

As part of its commitment to achieving the Sustainable Development Goals and promoting gender equality, the University of Gilgamesh organized a special event on the occasion of International Women's Day under the theme "You Are the Makers of Generations," serving as a platform to highlight the pioneering role of Iraqi women in society.

This event embodied the university's vision of women's empowerment by providing an environment that nurtures creativity and productivity, creating a vibrant and dynamic space for engagement and inspiration.

The participants showcased their outstanding works, ranging from handicrafts and arts to local products that reflect their high skills and refined taste.

The exhibition featured various pavilions presenting authentic Iraqi products crafted by creative women who transformed their passion into small economic ventures, contributing to development and empowering women both financially and socially. The event went beyond mere display, as it also included honoring a group of pioneering women in the fields of education, creativity, and production, in recognition of their significant contributions and dedicated efforts toward building and advancing society.

Through these comprehensive initiatives, the University of Gilgamesh reaffirms its unwavering commitment to empowering and supporting women across all domains, believing that the advancement of society begins with women's empowerment, and that every female achievement represents a step toward a brighter, fairer, and more equitable future. Supporting women is an investment in the future, a reinforcement of values based on justice and equality, and a driving force that propels development forward. Together, we build, together we grow, and together we create impact.

good health, and well-being

Conclusion of the Third Scientific Conference of the Iraqi Society for Clinical and Medicinal Chemistry. The third International Scientific Conference was successfully concluded at the University of Gilgamesh under the patronage of the Honorable Minister of Higher Education and Scientific Research, Dr. Laeem Al-Aboudi, under the theme “Medical and Health Sciences Towards Sustainable Development.” The event, organized by the Iraqi Society for Clinical Biochemistry in collaboration with the University of Gilgamesh, was held over two days, from September 21–22, 2023.

The President of the University of Gilgamesh, Professor Dr. Anwar Subhi Ljburi, delivered a welcoming speech, expressing his pleasure in hosting the Third International Scientific Conference of the Iraqi Society for Clinical Biochemistry. The event was attended by the President of the Pharmacists’ Syndicate, Prof. Dr. Mustafa Muhammad Amin Al-Hiti, deans of nursing, health technologies, and science faculties, heads of chemistry departments from governmental and private universities, as well as a distinguished group

of academic researchers and professors from various Arab countries and regional medical academic institutions. Additionally, specialists in health and medical technologies from the University of Gilgamesh and other Iraqi universities participated.

The conference proceedings were officially opened by Prof. Dr. Khalida Saleh Marza, President of the Iraqi Society for Clinical Biochemistry, who thanked the University of Gilgamesh for hosting the conference and expressed her hope that the event would achieve its scientific and research objectives.

The conference featured discussion panels, research presentations, and specialized workshops aimed at advancing a forward-looking vision for scientific research and keeping pace with the ongoing developments in health, medical, and laboratory sciences. This was achieved through the exchange of scientific expertise among researchers from various Iraqi and international universities, as well as through discussions on key issues related to medical sciences and their role in serving society by sustaining their scientific specializations in support of the medical sector.

The research papers presented within the conference program aimed to contribute to the sustainable development of Iraq’s healthcare sector. They covered a wide range of topics in medical and health sciences, including the development of new methods for disease diagnosis and treatment, improving the quality of healthcare services provided to citizens, and promoting scientific research in the fields of health and medical sciences.

Through science, we advance toward better health and sustainable well-being for every individual

Life Under Water

As part of its plans to sustain life below water, the University of Gilgamesh launches a major initiative to preserve fishery resources

The University of Gilgamesh has launched a major initiative aimed at sustaining aquatic life, enhancing fishery resources, and preserving them as a vital natural and national heritage. This initiative implements a concrete and practical approach adopted by the university to achieve the Sustainable Development Goals, particularly Goal 14: Life Below Water.

The initiative was carried out in collaboration with the Ministry of Agriculture – Department of Animal Resources, in coordination with the Environmental Protection Police and Community Police. As part of the program, thousands of juvenile fish were released into the waters of Najaf Al-Ashraf to support fishery resources and enhance their availability in local markets, recognizing their importance as a popular and essential dietary source. The Department of Animal Resources, represented by its Director General, Dr. Walid Muhammad Rzouqi, expressed gratitude and appreciation to the

University of Gilgamesh in recognition of its significant role in preserving and sustaining the national fishery resources.

Life Below Water – University of Gilgamesh Leads the Way in Baghdad

The University of Gilgamesh is the first university in the capital, Baghdad, to implement this initiative on the ground. Fishery resources are a crucial element for the ecological balance of our planet and for human well-being. However, they face numerous threats, including pollution and climate change, which also have serious consequences for human livelihoods and food security.

Through its ongoing initiatives and community engagement at various levels, the University of Gilgamesh strives to raise public awareness about the importance of national resources and ways to sustain and protect them. This is achieved through seminars, workshops, and practical field initiatives aimed at promoting environmental stewardship and sustainable practices.

Aquatic environments are a national treasure and a shared responsibility... The University of Gilgamesh is committed to preserving them for future generations.

Life on land

Reaffirming its commitment to the Sustainable Development Goals and its responsibility toward the environment and society, the University of Gilgamesh continues its dedicated efforts to build a green campus that enhances the quality of life both within and beyond the university grounds.

Believing that true development begins in places where knowledge is nurtured, the university has ensured that its campus serves as an exemplary environmental model embodying the principles of sustainability. It has expanded green spaces and increased plant coverage to provide a healthy and inspiring learning environment that balances natural beauty with psychological well-being.

In a pioneering step to promote biodiversity, the university launched an initiative to host local birds by installing colorful birdhouses and feeders on trees throughout the campus. This effort provides a safe haven for small creatures, reflects a deep environmental awareness, and connects students

directly with elements of nature, fostering a culture of care, harmony, and sustainability.

The University of Gilgamesh also conducts regular tree-planting campaigns and awareness programs in partnership with students and local institutions, as part of its vision to build

a sustainable, environmentally friendly campus that encourages teamwork and fosters a sense of communal responsibility rooted in citizenship and human awareness.

These initiatives are not merely green projects; they are a renewed message affirming that the University of Gilgamesh does not only graduate learners, but also cultivates environmentally conscious individuals capable of creating a lasting positive impact on their community and country.

Here, life flourishes within the university walls... greenery grows, birds sing, and the future blossoms with knowledge and responsibility.

“In every green leaf lies a promise of life, and in every environmental initiative, an extension of hope.”

Climate Action

Towards a Sustainable Campus and Active Environmental Awareness

Students of the College of Dentistry at the University of Gilgamesh continue their volunteer initiatives to address climate challenges by planting saplings and trees within the university campus. This step reflects a practical commitment to mitigating the effects of climate change and fostering a culture of communal responsibility among students.

This initiative is part of the university's comprehensive climate action plan, which aims to reduce the carbon footprint and improve air quality through sustainable tree-planting and beautification projects that absorb emissions and support the local ecosystem.

The university believes that responding to climate change begins with individual awareness and collective action. Therefore, it ensures student participation in tangible initiatives that translate education into measurable community impact,

helping to build an environmentally conscious generation capable of adopting sustainable behaviors that protect the planet for future generations.

The University of Gilgamesh also emphasizes that climate action is not a temporary task but an ongoing responsibility requiring cooperation between education and society. The university seeks to serve as a national

model in supporting the initiatives of the Ministry of Higher Education and Scientific Research to achieve the Sustainable Development Goals, particularly those related to climate change mitigation and adaptation.

A safer climate for the future of Iraq and the world. Every tree planted here, every initiative launched, is a promise of a more balanced life.

Climate action is an investment in the survival of both humanity and nature.

Affordable and Clean Energy

Scientific Symposium on Sustainable Energy Hosted by the College of Engineering at the University of Gilgamesh.

The College of Engineering at the University of Gilgamesh, in collaboration with the College of Engineering at the University of Kufa and the University of Technology, held a scientific symposium featuring specialized research papers on sustainable energy, under the title “Sustainable Energy Design & Application Symposium”.

Collaboration with the International Association of Universities: University of Gilgamesh Announces International Conference on Renewable Energy Sustainability

On Sunday, June 25, 2023, the University of Gilgamesh hosted a press conference where it announced an academic collaboration with the International Association of Universities to organize an international conference on renewable energy sustainability. The conference, themed “Future Energy Horizons and Sustainable Development in Iraq and the Region,” is scheduled for the end of this year and will feature broad international and local representation, with participation from foreign and Arab universities, as well as government institutions specializing in clean energy and its sustainable applications, aimed at serving society and improving Iraq’s electricity sector.

In his speech, Professor Muhammad Khair Al-Ghubai, President of the International Association of Universities, highlighted the importance of academic research and scientific conferences in generating practical studies that help reduce emissions and utilize alternative energy sources for electricity production. He emphasized the university’s role in achieving the Sustainable Development Goals through partnerships with government sectors responsible for electricity. He also praised the University of Gilgamesh for hosting rich

conferences and specialized engineering workshops that focus on renewable energy and sustainable resource management, providing effective and timely solutions to stabilize the country’s electricity infrastructure.

The University of Gilgamesh, through its twinning programs with governmental universities and partnerships with international organizations and academic associations, aims to produce practical outcomes that engage its academic staff in conferences and workshops to develop their skills and create genuine opportunities for knowledge exchange in renewable energy sustainability. Furthermore, the university seeks to integrate its graduates into the workforce by providing opportunities for specialization, employment, and connection with specialized companies, thereby reducing

unemployment and refining their professional skills. Earlier last month, the University of Gilgamesh, in collaboration with the College of Engineering at the University of Kufa and the University of Technology, organized a scientific symposium featuring specialized research papers on sustainable energy, titled “Sustainable Energy Design & Application”.

The symposium, which brought together professors and students, aimed to raise awareness and knowledge about alternative energy and its role in addressing climate change. It emphasized the importance of sustainable energy in today’s world to meet the urgent need for renewable and sustainable energy sources in the face of climate change and environmental degradation.

The event also provided a platform for experts and researchers to exchange knowledge and perspectives on sustainable energy, while encouraging collaboration and innovation in this vital field.

partnerships for the Goals

To Sustain Its Academic Partnerships... University of Gilgamesh Signs Scientific and Academic Cooperation Agreement with the University of Technology

As part of its efforts to strengthen research and academic collaboration, elevate scientific standards, and expand cooperation with other universities, the University of Gilgamesh signed today, Monday, March 20, 2023, a memorandum of scientific and academic cooperation with the University of Technology. The agreement aims to open new horizons for collaboration in academic fields, enhance scientific and research output, and support the publication of research in international journals. The University of Gilgamesh delegation, represented by its President, Professor Dr. Bahaa Saebri, along with Dr. Rima Qalaawi, Director General of the Educational and Research Complex, deans, and faculty members, was welcomed by Professor Dr. Ahmed Muhammad Al-Ghaban, President of the University of Technology, and a group of academic staff.

The agreement includes multiple provisions, such as conducting joint specialized research and publishing in journals indexed in global databases, supervising joint student projects in the College of Engineering, and organizing joint conferences, scientific courses, seminars, and workshops. It also covers faculty exchanges, academic visits, and

joint cultural, artistic, and sports activities.

In line with its commitment to achieving the Sustainable Development Goals, the University of Gilgamesh follows a policy of formal partnerships with academic institutions to develop effective research policies, facilitate faculty exchanges, and promote joint publications with local and international universities. Such agreements provide diverse benefits, including expanded research opportunities and access to new resources and expertise.

This agreement represents a strategic and fruitful partnership for both institutions to collaborate on joint research projects, exchange knowledge and

resources, and promote academic excellence. The agreement also aims to facilitate faculty exchange programs, allowing professors from each institution to visit the other's campus and work together.

Such collaboration will create opportunities for exchanging teaching and research methodologies, and enhance cross-cultural understanding. The academic cooperation agreement will also support student exchange programs, giving students the chance to experience different academic cultures and develop new perspectives. Additionally, the agreement may include joint research projects in various fields such as science, engineering, energy, and robotics.

University of Gilgamesh Signs Twinning Agreements with Iraqi Universities

The University of Gilgamesh signed twinning agreements with several Iraqi universities during the meeting of Colleges of Health and Medical Technologies in Iraq, held on September 28, 2022. Professor Dr. Bahaa Saebri, President of the University of Gilgamesh, signed a twinning agreement with the Northern Technical University

during the meeting. The Dean of the College of Health and Medical Technologies also signed a twinning agreement with the Northern Technical University focusing on curriculum harmonization and standardized assessments, as well as a twinning agreement with the College of Health and Medical Technologies at the Middle Euphrates University.

Dr. Saebri stated that these agreements aim to unify curricula, manage standardized examinations, and facilitate the exchange of expertise between governmental and private universities in Iraq. During the International Renewable Energy Summit in Kurdistan Region, Iraq...

University of Gilgamesh Signs Academic Cooperation Agreements with International and Local Universities

The University of Gilgamesh participated in the International Renewable Energy Summit, organized by the International Association of Universities in the Kurdistan Region of Iraq, held from July 25–28. The summit brought together regional and international representatives from academic institutions, universities, companies, and organizations working in the field of renewable energy from Iraq and the wider region.

During the summit, the University of Gilgamesh contributed academic research papers and studies addressing renewable energy topics and their role in sustaining green life in Arab communities, with a particular focus on Iraq.

Through academic agreements signed during the summit with several universities, including the University of Sabratha in Libya, Cihan University, Bayan University in the Kurdistan Region, Jannat University in Anbar Governorate, and Al-Hadbaa University College in Mosul, the university committed to organizing workshops and academic seminars on renewable energy, implementing joint research plans, and facilitating the exchange of teaching and academic expertise.

Recommendations from the University of Gilgamesh at the International Renewable Energy Summit in the Kurdistan Region

Among the recommendations presented by the University of Gilgamesh during the International Renewable Energy Summit were the development of renewable energy technologies, the encouragement

of investment in clean energy, and the promotion of a culture of renewable energy through workshops and awareness seminars that contribute to sustainable development. The university also emphasized the need to increase reliance on renewable energy in Iraq and across the region. In this context, the University of Gilgamesh announced an academic collaboration with its Presidency to organize an international conference on renewable energy sustainability under the theme “Future Energy Horizons and Sustainable Development in Iraq and the Region.” The conference, scheduled for the end of this year, will feature broad international and local representation, with participation from foreign and Arab universities, as well as government institutions specializing in clean energy and its sustainable applications. The event aims to serve society and support the advancement of Iraq’s electricity sector.

Joint Scientific Cooperation Signing of a Cooperation Agreement Between Galenus Medical Institution and the University of Gilgamesh

Within the framework of collaboration between Iraqi universities and training institutions, the Presidency of the University of Gilgamesh hosted Mr. Mustafa Jumhuri Ashneen, President of Galenus Medical Institution, along with his

accompanying delegation, on Tuesday, June 20, 2023.

The visit aimed to open new horizons for scientific and academic cooperation and to establish twinning agreements between Galenus Medical Institution and the university in various medical specializations.

The agreement included several provisions, such as organizing joint conferences, seminars, and workshops at both the institution and the university, in addition to facilitating mutual academic visits and diverse student activities.

The university delegation expressed their gratitude to the institution’s leadership for their cooperation and for providing all necessary facilities to support students and ensure the success of the visit.

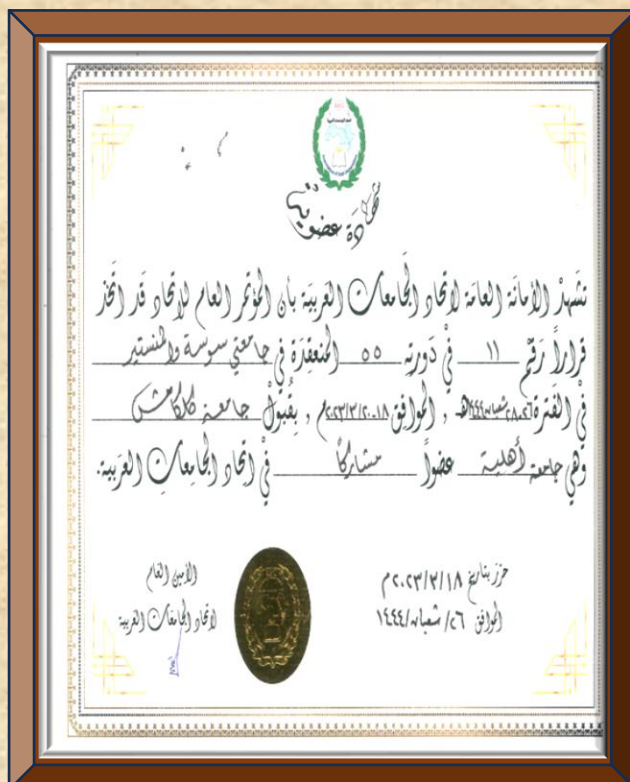

The University of Gilgamesh welcomes such agreements and is ready to provide full academic and scientific support within the framework of cooperation between governmental and private institutions, aiming to open new avenues for scientific collaboration.

Accreditations and Academic Excellence Awards
Culminating its journey of quality and leadership, the University of Gilgamesh has received a series of local and international accreditations and certificates. These recognitions reflect the university’s steadfast commitment to higher education and research standards, cementing its position among distinguished universities dedicated to achieving the Sustainable Development Goals and promoting academic innovation

Certificates of Accreditation and Academic Excellence

Pace, Justice and Strong

In line with its commitment to supporting the United Nations Sustainable Development Goals, the University of Gilgamesh has actively promoted Goal 16, which focuses on fostering peace, ensuring justice, and strengthening institutions. The university implements a variety of academic and awareness initiatives aimed at cultivating legal awareness among students and instilling values of justice, equality, and respect for the rule of law. Key activities include:

1 .Student Legal Clinic

The Legal Clinic at the College of Law, University of Gilgamesh, organizes a range of activities to enhance legal culture and human rights awareness, including:

- Conducting legal awareness sessions for students on their academic and societal rights and responsibilities.
- Providing free legal consultations on civil and student-related cases, supervised by specialized faculty members.
- Implementing an awareness program titled “Justice Begins with Awareness”, aimed at introducing students to principles of fairness, equality, and the rule of law.

2 .University Peace Day

Celebrated annually, University Peace Day promotes a culture of peace, tolerance, and non-violence among students, reinforcing values of coexistence and mutual respect through awareness activities and joint student initiatives.

“ • Say a Kind Word” Initiative: A student-led program encouraging the use of kind words in daily interactions, fostering a culture of respect, positivity, and mutual appreciation within the university community.

3 .Awareness Seminars and Workshops

- Organizing a seminar titled “Human Rights in Contemporary Iraqi Legislation” to commemorate the anniversary of the first national Iraqi constitution.
- Conducting educational lectures for students from various colleges on the importance of respecting the law, rejecting violence, and promoting tolerance and justice.
- Hosting student workshops to discuss integrity, transparency in public institutions, and the role of youth in combating corruption.

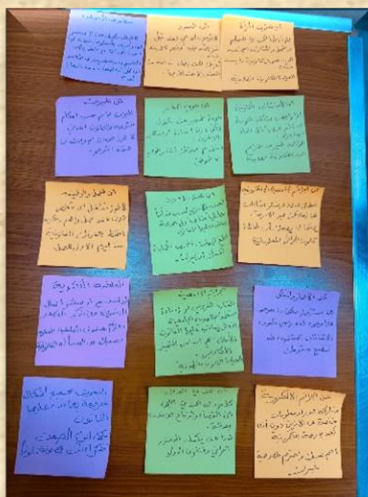

4 .Community Engagement and Collaboration Programs

- Law students participate in community awareness campaigns on legal rights and responsible citizenship, extending the university’s impact beyond the campus.

These initiatives reflect the University of Gilgamesh’s commitment to integrating SDG 16 into student life and academic culture, preparing a generation of socially responsible and legally aware citizens.

Collaboration with Civil Organizations: Implementing short programs on women’s and children’s rights in light of Iraqi legislation.

- University Justice Project: Integrating the University Justice initiative into the annual activities plan to promote a culture of dialogue and peaceful conflict resolution within the campus.

Quality Education

Gilgamesh University strives to make a meaningful contribution to achieving Goal 4 of the United Nations Sustainable Development Goals, which focuses on “ensuring inclusive and equitable quality education and promoting lifelong learning opportunities for all”.

Through a variety of academic and community-based initiatives, the university aims to enhance the quality of education in Iraq and foster a culture of continuous learning and innovation.

The university works toward this goal through the following actions:

1. Developing academic programs that align with national and international standards of quality assurance and accreditation.
2. Training and capacity building for faculty members through workshops and professional development courses that enhance their scientific and pedagogical competencies.

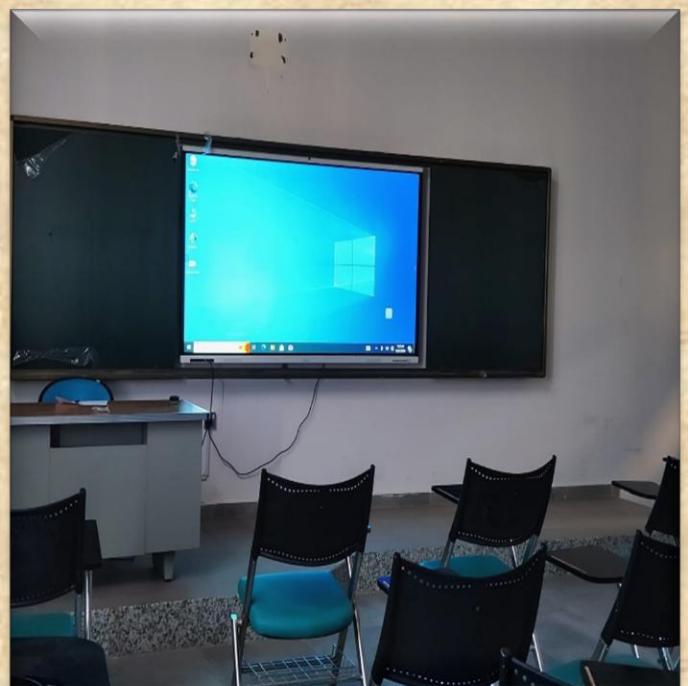

3. Providing a safe, stimulating, and technology-driven learning environment that promotes interactive and modern teaching methods.

4. Supporting scientific research and innovation by encouraging students to participate in applied research projects that address community needs.

5. Promoting educational inclusion by offering learning opportunities to students from diverse social backgrounds and supporting persons with disabilities.

6. Enhancing community engagement through awareness seminars and educational lectures that promote the values of lifelong learning, tolerance, and responsible citizenship.

Through these initiatives, Gilgamesh University reaffirms its commitment to its pioneering role in building an educated and conscious generation that contributes effectively to sustainable development and the creation of a better future for Iraq.
